

MEMORANDUM

To: CDDR Member Organizations
From: João Dürr, CDCB CEO
Date: March 21, 2016
Subject: CDDR genomic data access

The CDCB staff has been regularly requested by CDDR members to send genomic data (genotypes) of animals under their control to third parties. Although this practice has been accommodated as a favor in the past, it is our understanding that is not covered by the Material License Agreement signed between the CDCB and NAAB.

Therefore, effective immediately, the CDCB will no longer provide genotypes on behalf of CDDR members. The respective genotyping laboratories are equipped to perform this task and should be contacted instead.

Thank you for your understanding.

Regards,

João Dürr
CDCB CEO
